INNOVATIONS IN REGENERATION

Deliver rejuvenating topical serums through thousands of micro-channels with no pain or downtime.

Introducing DermaFrac™ - the patent-pending, dermal micro-channeling system that offers simultaneous delivery of infused ingredients in a pain-free, no downtime treatment that can be administered by an aesthetician.

An alternative to fractional laser treatments, DermaFrac™ offers the added benefit of active infusion of topicals without anesthesia and at a lower cost.

Designed expressly to drive topical solutions to penetrate deeper into the tissue, DermaFrac™ creates micro-channels to the DE junction while simultaneously infusing topicals to this all-important tissue layer.

By combining precisely calibrated needle penetration and unprecedented infusion capability, DermaFrac™ takes infusion technology to a whole new level.

DermaFrac™ creates micro-channels to the DE junction while simultaneously infusing topicals to this all-important tissue layer.

DermaFrac™ delivers:

- high-grade active ingredients to the dermal layer including peptides, skin lighteners, hyaluronic acid moisturizers, and a clarifying complex
- effective procedures with a pleasant client experience
- repeat customers and more profits

DermaFrac™ eliminates:

- heat issues and the complications and expense of laser treatments
- the extra step and inefficiency of delivering topicals separately into the skin
- risk for darker skin types
- the need for anesthesia

The Science Behind DermaFrac™

DermaFrac™ offers the best infusion of the best topicals for the best results.

Perfecting the science of topical serums for skin rejuvenation.

The topical solutions we have developed maximize the skin rejuvenation process. Their viscosity and molecular size are specifically designed to deliver greater penetration. Our goal is simple: maximum results for your clients and maximum profits for you!

One Device, Three Configurations

At Genesis Biosystems, we design and build systems that get exciting results for our customers and their clients. DermaFrac™ delivers profits and flexibility by offering multiple treatment modalities in one system.

- III ► **COMPLETE SYSTEM:** DermaFrac™ + Crystal-Free Microdermabrasion + LEDs
- II ► **DUAL MODALITY:** DermaFrac™ + Crystal-Free Microdermabrasion
- I ► **SOLO:** DermaFrac™ only

The DermaFrac™ Treatment:

- Micro-channels deliver high grade serums to the DE junction.
- The body's natural response to a mild trauma increases collagen and fibroblast activity.
- The delivery of sophisticated serums to the skin nourish and stimulate for excellent results.

Microdermabrasion:

- Bio-Barrier™ disposable tip cap design eliminates concerns of viral or bacterial cross-contamination.
- No cleaning or sterile processing required between treatments, saving you time and money.
- Choose from six disposable crystal-free tips ranging in abrasiveness and shape for exact, even peels.

LED Light Therapy:

- High energy LED light therapy reduces treatment time.
- CoolBreeze™ wands cool and soothe the skin with gentle airflow during the treatment.
- Blue and Red LEDs give you options depending on the skin condition being treated.
